

STL Roadmap (Beginner → Advanced)

Level 0: Basics Required Before STL

Learn:

- Functions
 - References (&)
 - Pointers (basic)
 - Arrays
 - Classes (basic idea)
 - Templates (very basic idea)
-

Level 1: Core STL (Must Master)

1. Pair
 2. Vector
 3. Iterator
 4. Sort
 5. Stack
 6. Queue
-

Level 2: Hashing & Searching

7. Set
 8. Unordered Set
 9. Map
 10. Unordered Map
-

Level 3: Interview STL

11. Priority Queue
 12. Deque
 13. Multiset
 14. Lower Bound
 15. Upper Bound
 16. Binary Search
-

Level 4: Advanced STL

- 17. List
 - 18. Multimap
 - 19. Custom Comparator
 - 20. next_permutation
 - 21. __builtin_popcount
 - 22. STL Algorithms
-

Level 5: Expert

- 23. Lambda Functions
 - 24. Custom Hash
 - 25. Policy Based Data Structures (PBDS)
-

Learning Style

For every topic we'll follow:

1. Theory

What problem it solves.

2. Syntax

How to create/use.

3. All Important Functions

Interview level.

4. Time Complexity

Very important.

5. Exercises

Easy → Medium.

6. Revision Notes

1-page summary.
